[in alvaro-padilla-mendoza](#) [ese-varo](#)

Telematics Engineer, I'm 25 years old, self taught web developer, mainly interested on Open source web technologies. Always willing to learn new things, trying to write clean code and improving it while enjoying the continuous learning process. I really like sharing knowledge whenever possible, so that, I can help others.

### TECHNICAL SKILLS

#### Front End

Competent

html css javascript sass  
reactjs bem bootstrap

#### Back End

Competent

mvc ruby on rails ruby linux  
regex

#### Ruby

Competent

ruby ruby on rails clean code

#### Ruby on Rails

Competent

ruby rspec web development  
css html erb capybara

#### ReactJS

Advanced beginner

web development reactjs

#### Git

Competent

linux github git

#### C

Advanced beginner

electronics embedded systems  
pic

#### COBOL

Competent

jcl easy trieve db2  
mainframe

### SOFT SKILLS

#### Teamwork

Acquired

willingness helping others  
empathy listening

#### Willingness to learn

Acquired

perseverance critical thinking  
research troubleshooting  
self-taught

#### Adaptability

Acquired

responsability flexibility

### WORK EXPERIENCE (3)

**Apprentice** at Bright Coders Academy/'Donadores Compulsivos' Project **January 2020- July 2020**

<https://www.brightcoders.com/>

Participated in the BrightCoders Academy Program where we were trained on using Ruby and Ruby on Rails for building web sites through the implementation of best practices and standards in the field. We applied the acquired knowledge implementing new features, using mainly Ruby on Rails, to continue the development of the 'Donadores compulsivos' association's web site.

- Modifying existent controllers and creating new ones when required.
- Adding specific functionality through different gems.
- Adding new views and modifying existing ones using: HTML, CSS, JavaScript, JQuery, Sass, BEM, etc.
- Using github platform to integrate the software development process, through its tools: 'projects', 'issues', 'pull requests', 'milestones' and some others.
- Implementation of software development agile methodologies.

### **Mainframe Developer** at Tata Consultancy Services **January 2017- March 2018**

<https://www.tcs.com/>

Development, testing, debugging, implementation and support for existing programs using COBOL, JCL and Easytrieve programming languages with DB2 data bases.

- Adding new features to existing programs.
- Supporting test environments on fixing any issue related with jobs from daily batches.
- Improvement and software maintenance working in an agile environment.

### **Intern** at Siteldi Solutions **August 2016- December 2016**

<http://siteldisolutions.com/i-d/>

Collaborated as a front-end web developer into the project 'Diseño e implementación de un sistema multimedia y de comunicación para vehículos conectados' (Mueves II), creating a website to show local weather data, air quality conditions, warnings, weather stations location and geolocalization of vehicles using company's own system.

- HTML
- CSS
- PHP
- JavaScript
- Leaflet
- Mapbox
- Yahoo Weather API
- twitter API
- JSON
- JQUERY
- AJAX
- GIT

### **EDUCATION (1)**

---

**Engineer's degree Telematics Engineering** at Universidad de Colima  
**2013 - 2017**

**Grade:** 9.12

### **LANGUAGES**

---

**English**

*Competent*

**Spanish**

*Native speaker*
