PHP
Competent

laravel   codeigniter

Laravel
Competent

laravel

GNU/Linux
Proficient

gnu/linux   linux   free software

SQL
Competent

sql   mysql   database

React
Advanced Beginner

react   web development

Node.js
Advanced Beginner

node.js

Git
Competent

git   github   gitlab

Java
Competent

java

Posmant
Novice

posmant

Heroku
Advanced Beginner

heroku

SOFT SKILLS

Communication
Acquired

Problem resolution
Acquired

Creative
Acquired

Responsibility in decision making
Acquired

Determination
Acquired

WORK EXPERIENCE (3)

Intern at Tecnocible **March 2018- August 2018**

www.tecnocible.com/

I did my TSU internship at the company Tecnocible for 4 months. I had the opportunity to develop a project that solved the problem of a newspaper company in the city of Colima. I made use of technologies such as PHP, MySQL, JQuery, JavaScript and Bootstrap. In this company, we apply the agile Scrum methodology for project delivery.

- Started working on my first real project with a client, working on a company.

Project manager at Magsan Motors **October 2018- November 2019**

www.magsanmotors.com/

In the company MAGSAN MOTORS, I worked 9 months as project leader, I also participated in the development of an operating system of an electric car, using technologies such as Java and different types of sensors, in this project also Scrum methodology was implemented.

- I worked, for the first time, as project manager and as developer simultaneously.

https://www.brightcoders.com/

I worked on developing a web application for the 'Donadores Compulsivos' association, using technologies such as Ruby On rails, Sass, Javascript, Git and GitHub as well as working on testing using rspec and capybara.
