I am passionate about technology and design. I am currently in the last semester of software engineering at the 'Universidad de Colima', I like working with teams, and I always try to have a positive attitude and think outside the box. I always try to solve problems with critical thinking that support the solution I propose.

I consider myself a good leader, with responsibility at work, good communication with others and growth mindset.

In the near future, I see myself working in a prestigious company in Mexico, as a UI/UX Designer.

EDUCATION

Bachelor degree in software engineering
-'Universidad de Colima'

WORK EXPERIENCE

▶ **BrightCoders Academy / Untitled**

February 2020 — Actuality

UI/UX Designer
In this project, I participated creating wireframes and high fidelity designs for an eCommerce that allows the users to buy clothes from the brand untitled, also I create the flow of the web page with a "Dogo map" and develop communication skills with my teammates and the client.

▶ **BrightCoders Academy / Tribo**

February 2020 — Actuality

UI/UX Designer
In this project, I participated making the high fidelity designs basing on the wireframes that already exist of this project, also i have the opportunity to come up with a color pallet and typography for this mobile app.

▶ **MagmaLabs / Ecomlatam**

Junary 2020 — June 2020

UI/UX Designer

In this project, I had the opportunity to work improving design that already exists based on new trends and user research, the new designs were made using tools like Adobe XD

▶ **Centro Universitario de Estudios de Genero / SocialHelp**

July 2019 — December 2019

UI/UX Designer

In this project, I participated making the user research using different techniques to recover all the requirements and also making some interviews to recover the possible users' point of view. I was involved in the user interface designs too.
