## ABOUT ME

I am a Computer Systems Engineer with a passion for designing and developing modern Mobile/Web solutions. I like learning about the newest ways to improve my design and developing abilities. My short-term goal is to form part of a wonderful environment where I can grow as a developer/friend/person/worker.

## WORK EXPERIENCE

**Bioalcalina**, Colima – *Ecommerce web/mobile designer and developer.*

2018 – PRESENT

My role is to design, develop, implement, maintain, and renew an e-commerce website using tools like Bootstrap, Wordpress, HTML, CSS, JS, and working on React JS implementation for web and React Native for Mobile.

**Leon Film & Photo** – *React designer/developer.*

2019 – PRESENT

I am in charge to design and develop a web/mobile portfolio using React Js and React Native.

## EDUCATION

Instituto de Capacitación Y Educación Profesional, Colima – Engineer

2016 – 2019

I studied Computer Systems Engineering because I consider it is one of the most interesting and helpful careers to design a better future.

**Bright Coders Academy**, Colima – *React Native Developer*

2020 – Present

I form part of a fantastic bootcamp where I improve my react knowledge using Reacts methodology (learn by doing) so with my team we design, develop, test and present real projects using good practices, GitHub Planner, and other new technologies.
